

Ames Housing Data/ Kaggle Challenge

DSI - 13 Project_2

Julian Broche - East Coast cohort

I've been hired by Grimes Asphalt & Paving to explore the Ames Iowa dataset, in order to solicit customers within the city limits of Ames, Iowa.

I support an iOS App/Marketing campaign utilizing EDA and Predictive MODEL

Problem Statement

**Does paving your driveway
lead to statistically
significant higher valuation
overall and offset cost?**

Let's find out.....

Qualitative Findings

- Often **overlooked** feature of a home
- Value is partially determined by the surrounding neighborhood, if your homes driveway is in bad shape and all others are in good shape, your home will have a **lower perceived value**
- Usually paving a driveway will give you a return of **AT LEAST** the cost of it being installed
- The average asphalt driveway costs about between **\$2,924 - \$6,549** to install
- While it increases the value of your home, a nice paved driveway can also help sell your home **FASTER**

Quantitative Findings

Does data support initial qualitative research?

Overall Paving Equates to Higher Valuation

Confidence Intervals for Paved, Partial Paved and Unpaved Driveways by MS_SubClass show statistical significance

95% CI for Paved = ~\$119k - \$161k

95% CI for Partial = ~\$110k - \$161k

95% CI for Dirt/Gravel = ~\$86k - \$131k

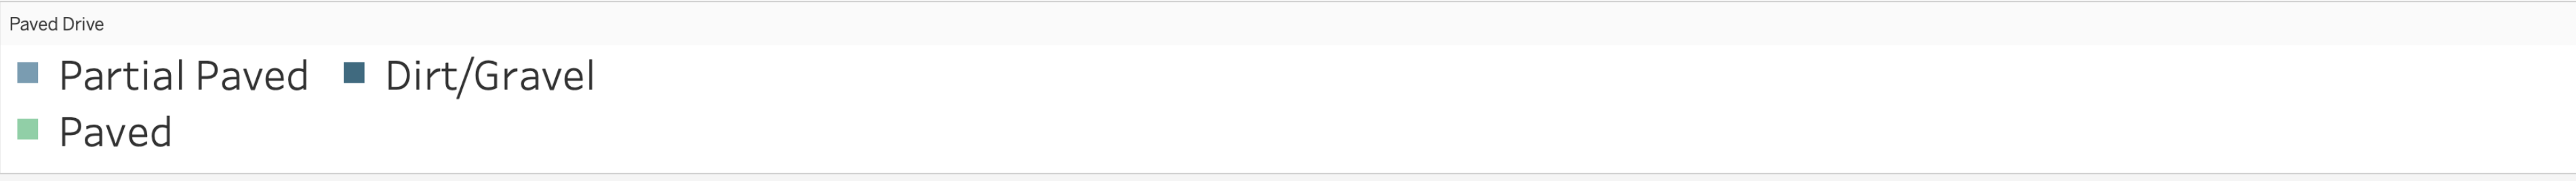

What the D*ff?

Homes with Paved and Partial Paved driveways on average are higher by 32% and 18% respectively, compared to homes in the same neighborhood

Paved Drive
Partial Paved Paved

Median Price By Neighborhood

Lets Talk Model

Lets Talk Model Features

- MS_SubClass
- MS_Zoning
- Lot_Area
- Alley
- Neighborhood
- Bldg_Type
- Overall_Qual
- 1st_Flr_SF
- 2nd_Flr_SF
- Garage_Area
- Paved_Drive
- Total_sq
- Ratio_lotsq
- Age

Lets Talk Model Performance + Hypothesis

H_0 : The average difference in SalePrice between Paved and Unpaved Driveways is Zero

H_A : The average difference in SalePrice between Paved and Unpaved Driveways is not Zero

P_value = 1.55 , we failed to reject our null hypothesis, we need to rethink our question

Metrics	
MSE	651624374
RMSE	25,526
MSLE	0.0191
MAE	12,799
R^2	0.8873
Adjusted R^2	0.8693

Beta (β) Coefficients	
Overall_Qual_10	\$168,572
Neighbor_StoneBr	\$38,080
MS_Zoning_I	\$16,744
1st_Flr_SF	\$62 per sq
Paved_Driveway	\$4036

Recommendation

**Recommend property owners to
invest into repaving an existing
driveway or paving a new one**

**Data clearly shows it adds value +
pays for itself!**

**Let's pave the way to
your success.**
